Software Engineer

Education

MSc Artificial Intelligence & Engineering Systems — Sep 2025 - Jun 2027
TU/Eindhoven — *Track: Healthcare*

BSc Data Science & Artificial Intelligence — Sep 2021 - Dec 2024
Maastricht University — *Thesis: Data Analysis of Classroom Dynamics*

Experience

ASML (asml.com) — Feb 2026 - Current
Software Engineer Intern (Tribology & Electrostatics Research Department)

- Reduced time to visualize tribology experiment data from 20 minutes to sub-second by building a preprocessing pipeline across a 60 TB database. Adopted by 10+ engineers
- Full time internship parallel to my master studies
- ***Tech**:* MATLAB, Python (Flask)

Sqippa (sqippa.com) — Sep 2024 - Feb 2026
Software Engineer

- Built scheduling and data migration tools used by 101 owners across 7,030 IoT devices on Sqippa's platform.
- ***Tech**:* AWS SAM, AWS Lambda, DynamoDB, React (v16)

Smart Health And Science School (smarthealthandscience.nl) — Feb 2024 – Jun 2024
Software Instructor

- Taught Scratch, Python, and Robotics to classes of 8–12 year olds in an afterschool program

Ans (ans.app) — Sep 2023 – Feb 2024
Data Science Intern - Natural Language Processing (NLP)

- Built an NLP pipeline to automatically tag exam questions with relevant keywords at Ans, a Dutch edtech platform used by universities and high schools
- ***Tech**:* Python, HuggingFace
